

LOW SPEED GRANULATOR

The Mini Goliath is Summit Systems' most compact low speed granulator. It has been designed for recycling of very small sprues (1-4mm diameter) including glass fibre material.

The Mini Goliath has a rotor with a unique tooth design for both trapezoidal and helical cutting. Its resistant steel coating protects the teeth from damage and wear by abrasive materials. A special titanium coating option is available for maximum wear protection .

Features

- Very little floor space
- Easy to move at 45kg
- Reversible cutters and combs for double the life span
- Low power consumption at 0.55kW
- Very low dust
- Easy to clean
- Very quiet

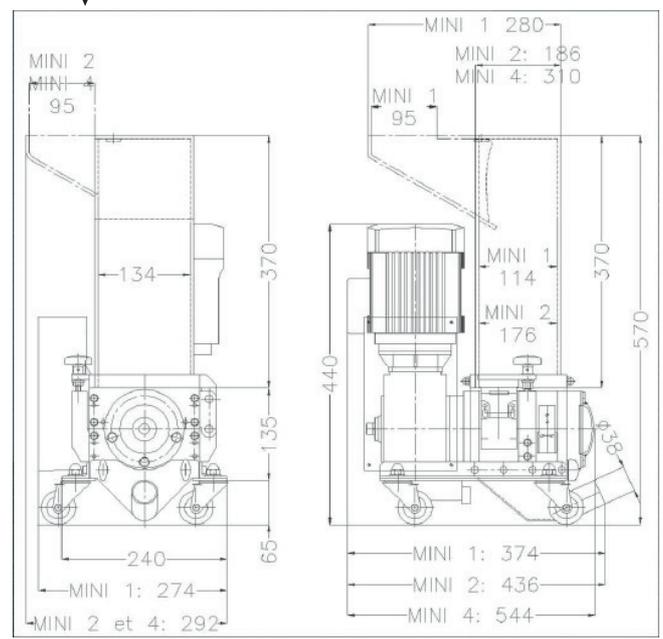

Mini Goliath	Mini 1	Mini 2	Mini 4
Motor power (kW)	0.55	0.55	0.55
Cutting chamber (mm)	134 x 114	134 x 176	134 x 300
Max theoretical output* kg/h	2	3	5

\*Important variations according to material, granulometry and way of feeding
